OBJECTIVE

To work in a professional environment where I can utilize my technical, managerial and communication skills. And, to climb up the corporate ladder with my consistency and eagerness to learn more.

EXPERIENCE

SITE ENGINEER

ENGINEERING SOLUTION AND CONSTRUCTION.

DECEMBER, 2018 – Present

- Supervise and manage on-site construction activities to ensure compliance with project plans, specifications, and timelines.
- Coordinate with project stakeholders, including contractors, consultants, and clients, to address technical and logistical challenges.
- Monitor progress, conduct site inspections, and ensure adherence to safety standards and regulations.
- Prepare daily, weekly, and monthly progress reports, highlight key accomplishments and challenges.
- Conduct quality control checks to ensure construction materials and workmanship met project specifications.
- Prepare accurate cost estimates for construction projects by analyzing drawings, specifications, and client requirements.
- Conduct site visits to assess project scope, identify potential challenges, and refine cost projections.
- Research and evaluate material costs, labor rates, and equipment usage to create detailed bid proposals.
- Collaborate with project managers and procurement teams to develop budgets and secure competitive pricing.
